

# CWFIS Data Placemat - List of Services

Current as of: March 31, 2026

This "placemat" contains a list of key map layers delivered as CWFIS public services. It also includes details regarding changes/updates to many of the legacy CWFIS data services.

**NOTE:** We are currently in the process of migrating all data layers from our CWFIS Legacy GeoServer to a new, upgraded CWFIF GeoServer environment. This document reflects the status of this migration and includes updated layer names associated with the upgraded system. The new CWFIF GeoServer introduces several enhancements, including support for a time dimension, enabling more dynamic and flexible data access supporting date/time based queries.

Contact: [cwfisnotify-scifvnotification@nrcan-nrcan.gc.ca](mailto:cwfisnotify-scifvnotification@nrcan-nrcan.gc.ca)

**Resources:**

CWFIS Data Catalogue - For more information about individual data products and services - <https://cwfis.cfs.nrcan.gc.ca/en/catalogue>

CWFIS Downloads Directory - <https://cwfis.cfs.nrcan.gc.ca/downloads>

How to use CWFIS Data Services - <https://cwfis.cfs.nrcan.gc.ca/downloads/docs/en/how-tos/how-to-access-cwfis-data-services.pdf>

**GeoServer Endpoints:**

**NOTE:** CWFIS currently uses two GeoServer instances to provide data services—our CWFIS Legacy GeoServer and the newer Canadian Wildland Fire Information Framework (CWFIF) GeoServer. All services will be migrated to the new CWFIF GeoServer to ensure a unified, single service endpoint.

**CWFIS Legacy GeoServer** - For full list of services available, view GetCapabilities - <https://cwfis.cfs.nrcan.gc.ca/geoserver/ows?service=WMS&version=1.3.0&request=GetCapabilities>

**CWFIF GeoServer** - For full list of services available, view GetCapabilities - <https://geoserver.cwfif.nrcan.gc.ca/geoserver/ows?service=WMS&version=1.3.0&request=GetCapabilities>
